

Tritex MultigaUGE 3000 Testimonials

“We have been using the Tritex MultigaUGE 3000 Underwater Thickness Gauge now for over two years and we are extremely pleased with its performance. The gauge has been used on many jobs in harsh environments, most recently in Dover Harbour, and it has easily withstood the rigors of these testing conditions. We have a lot of experience using underwater thickness gauges but my team insist on using only the Tritex gauges now. The MultigaUGE 3000 gives stable measurements and locks onto readings instantaneously compared to other gauges on the market, especially on very corroded metal. In addition, the support and after sales service from Tritex NDT is exceptional. We would highly recommend the MultigaUGE 3000 Underwater Thickness Gauge to anyone investigating purchasing a new gauge.”

[SeaTech Commercial Diving Services Ltd, United Kingdom](#)

“The gauge worked well and we got readings off the hull, I have to admit to being surprised given the corroded state of the hull.”

[Ministry of Defence DE&S Salvage and Marine Operations \(SANMO\), United Kingdom](#)

“Superb gauge with excellent after sales service”

[J G Marine Services, United Kingdom](#)

“Very pleased with the technical advice and information provided before and after our purchase”

[Churchill Specialist Contracting, United Kingdom](#)

“The MultigaUGE 3000 is absolutely brilliant, we love it! If there was any problem we would tell you. Also, the service is excellent!”

[Valkyrie Diving, United Kingdom](#)

“It is a sensitive unit and works very well!”

[Red Sea Diving, Egypt](#)

“An excellent Gauge, that is easy to use & set up. Does what is says on the box!”

[Scantech Airsupply UK Ltd, United Kingdom](#)

“As a diver and engineer I am very satisfied with the Tritex gauge. Especially because the Tritex is easy to use with easy maintenance. While working in Copenhagen harbour it is important that the instrument is robust and have a large and easy to read display.”

[Niras, Denmark](#)

“Thank you for supplying ASP with equipment that can get the job done, when required. The Tritex machines that we bought from you are excellent”

[ASP, South Africa](#)

“Very happy with the underwater gauge. Its display is very easy to see in all situations.”

[Shetland Islands Council, United Kingdom](#)

“As far as I am concerned Tritex gauges are the best thickness gauges I have used (that exclude the paint) and they are less expensive than other makes that come close”
